

Skanda Chittuluru

Irving, TX | +1 (857) 891 8029 | Skanda.chittuluru@gmail.com | [LinkedIn](#)

Detail-oriented Data Analyst with expertise in SQL, Python, and data visualization tools (Tableau, Power BI, Excel). Skilled in transforming large datasets into actionable insights and building dashboards to support decision-making. Strong background in statistical analysis, machine learning, and business analytics, with experience delivering predictive models and interactive reporting solutions.

EDUCATION

Northeastern University

Boston, MA

Master of Professional Studies in Analytics

Expected March 2025

- **Coursework:** Advanced Statistical Analysis, Machine Learning, Database Management Systems, Data Visualization

Lancaster University

Lancaster, UK

Bachelor of Science Honors in Business Analytics

Oct 2020 – July 2023

- **Subjects:** Business Analytics Project, Managing Business information systems, Techniques for Management Decision-Making, Spreadsheet Management, Project Management.

SKILLS & ACTIVITIES

Programming Languages: R, Python (Panda, NumPy, Scikit-Learn, Matplotlib, Seaborn, PySpark), SQL.

Databases: MySQL, Postgres SQL, Microsoft SQL server, SQLite.

Data Visualization Tools: Tableau, PowerBI, Qlik View, Advanced Excel (Vlookup, Macros, VBA etc.)

Tools: Microsoft Office, Google Analytics, Cloudera, GitHub, Apache Spark.

PROJECTS

Child Maltreatment Dashboard – Excel, Tableau, PowerBI, Python

- Supervised a team of five collecting child abuse data from UNICEF, CPS, and NCANDS.
- Cleaned, combined, and transferred data from over ten datasets into Tableau using advanced Excel techniques.
- Designed Tableau visualizations for America's Children in the 100 chart book for the KARA group.

Perfect Events Application- My SQL, SQL Lite, Database Design, Management

- Designed a relational database in SQLite for event planning, income forecasts, and scheduling management.
- Developed ERD, database schema, and reports to analyze event profitability, space utilization, and spending.
- Implemented encryption protocols and a one-tier architecture for secure, streamlined resort operations.

Predicting Loan Defaults – Python, R, Excel, PowerBI

- Led data cleaning, feature engineering, and EDA on a large dataset for predicting loan defaults.
- Developed and evaluated machine learning models, achieving 91.12% accuracy in predicting loan defaults.
- Delivered insights into key predictors like debt-to-income ratio and revolving credit utilization.

NYC Arrest Dataset Analysis – Excel, Tableau, Qlik View

- Led analysis of NYC arrest data, exploring trends in arrest rates, crime types, and demographic patterns.
- Developed interactive Tableau dashboards to visualize racial disparities, crime distribution, and age-related trends.
- Delivered insights into law enforcement patterns, guiding policy recommendations and optimizing resource allocation.

WORK EXPERIENCE

Scholar IT

California, USA

Python Developer

July 2025 - Present

- Developed and maintained Python applications to streamline data processing and reporting workflows.
- Built and integrated REST APIs, enabling smooth automation and improved analytics pipelines.
- Collaborated with cross-functional teams to create data-driven solutions and optimize reporting dashboards.
- Debugged, optimized, and documented code for reliable and scalable analytics systems.
